A.C. COMPRESSOR MOUNT 132R
Small Block Chevy - Short Water Pump Passenger Side

As with any part of this nature, make sure it fits your application before painting or plating. Parts that have been painted, plated, or modified may not be returned.

If your head only has one bolt hole, it will be necessary to drill and tap one hole in the head. Using the brackets as a template, mark the location on the head. Drill with a 5/16" bit and tap 3/8-16". The number of washers between the head and 1/4" spacer will vary with different castings. As with any mount system, assemble all of the brackets to engine BEFORE TIGHTENING THE BOLTS.

We use a belt length of 58 1/2 - 59 1/2" with this mount on installations in our shop. However, this can vary with the diameter of your pulleys.
